DETAILED ACTION

Response to Arguments

 Applicant's arguments filed with an amendment on 1 August 2005 have been fully considered but they are most in view of the new basis of rejection.

Claim Rejections - 35 USC § 103

- 2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 3. <u>Claims 37-69</u> are rejected under 35 U.S.C. 103(a) as being obvious over Logan et al. (US005721827A) in view of Hammons et al. (US006477509B1).
- 4. Logan et al. teaches (independent claims 37, 48 and 59) an apparatus, method and program for determining a refund, the method comprising the steps of: accessing and transmitting, via a network (col. 4 line 13 and Fig 1) selected content data (programming), to one or more user locations (players 103, col. 2 line 63 to col. 3 line 9), some of the content data/programming including advertising data (advertising segments, col. 6 lines 58-59), in response to a request from the one or more user locations for the selected content data/programming (col. 6 lines 45-51); and calculating the amount of advertising required to maintain the subscription cost at a user-specified fixed amount per unit time, said reduction in subscription cost constituting credits (col. 11 lines 36-44, col. 9 line 51 to col. 10 line 5, col. 19 line 63 to col. 20 line 23 and col. 26 lines 53-56), which reads on calculating a refund quantity as a function of the number of transmissions of the selected content data/programming and whether the selected content included advertising data/advertising segments, and determining the credits, which reads on a plurality of levels of an entitled refund the refund quantity translates to, wherein said plurality of levels/credits of an entitled refund includes a fee credit (the reduction in subscription cost).

Application/Control Number: 09/819,965

Art Unit: 3622

5. The examiner could not find "a plurality of levels" disclosed in the spec. The spec. does disclose "the number of points" (para. [0383] of the published application, US 20020046097A1), which the examiner accepts as substantially equivalent to "a plurality of levels". Hence credits in Logan et al. corresponds to the disclosure of "the number of points" as well as corresponds to the claimed "a plurality of levels".

- 6. Logan et al. does not teach that said refund includes merchandise. Logan et al. does teach that said refund/credits comprises an incentive for accepting advertising (col. 7 lines 60-63). <u>Hammons et al. teaches</u> that said refund/incentive includes merchandise, especially merchandise sold by the advertisers (col. 2 lies 15-18). Because Hammons et al. teaches that this will increase income of the system operator (col. 1 lines 27-30 and col. 3 lines 24-26), it would have been obvious to one of ordinary skill in the art, at the time of the invention, to add the teachings of Hammons et al. to those of Logan et al.
- 7. Logan et al. also teaches at the citations given above claims 38, 49 and 60; claims 40-41, 51-52 and 61-62, where subscription cost (col. 10 line 1) reads on connection fee and use fee; and claims 44, 55 and 66.
- 8. Logan et al. also teaches at the citations given above claims 39, 50 and 61 (col. 9 lines 5-11); claims 42, 53 and 64 (col. 9 lines 62-63); and claims 47, 58 and 69, where royalty payments due to content providers (col. 15 lines 40-41) reads on contributions.
- 9. <u>Hammons et al. teaches</u> claims 43, 54 and 65 (col. 3 lines 18-23).
- 10. Neither reference teaches (claims 46, 57 and 68) that the ad is placed at the head (beginning) of the content. Because it is common practice to begin programming with advertising, it would have been obvious to one of ordinary skill in the art, at the time of the invention, to the teachings of Logan et al. that the ad is placed at the head (beginning) of the content.

Conclusion

11. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Donald L Champagne whose telephone number is 571-272-6717.
